At *Livingetc* we pride ourselves on being ahead of the trends – and nothing says ‘beyond the zeitgeist’ quite as well as a range of furniture that feels so totally timeless that it’ll look fresh for years to come. So let us introduce you to the Umi collection designed in collaboration with Atkin and Thyme. It’s furniture that is a celebration of the purity and clean-lined simplicity that the Japandi movement has become famous for, with each piece characterised by subtle warmth of material and outstanding build quality.

Umi means ‘sea’ in Japanese and the gentle U-shaped curves incorporated

into every piece echo the softly rolling crests of the ocean at its most calm. It’s these subtle details – along with the smooth oak finishes and gentle bourbon wood stains – that we think allow these wonderful designs to blend seamlessly into the decor you already have, elevating and enhancing it in a way that feels completely contemporary.

We’ve long featured the beautiful work of Atkin and Thyme in our pages, a brand now marking its tenth year of creating elegantly crafted furniture and home accessories. There is an understated charm to everything Atkin and Thyme
